Education

University of Delaware

August 2023 – Present GPA: 3.79/4.00

- B.S. in Biomedical Engineering, Minor in Biomechanical Engineering
- Dean's List (5/5)
- Recipient of Presidential Scholarship

Work Experience

Medical Device Design, University of Delaware – *Teaching Assistant*

January 2026 – Present

- Supported student teams through the medical device design process
- Provide feedback on deliverables and documentation
- Assisted with lab/studio activities and SolidWorks (CAD) product development

Residence Life & Housing, University of Delaware – *Resident Assistant*

August 2024 - Present

- Supported and guided 40 students; resolved resident issues and documented occurrences
- Reported maintenance needs; coordinated events and activities
- Responded to emergencies and mentored students on academic/personal concerns

Volleyball Long Island (VBLI) – *Employee*

June 2022 - Present

- Set up nets and responsible for merchandise sales during events/tournaments
- Coordinated with players and staff to ensure events ran smoothly

Groundskeeper, Northport-East Northport UFSD – *Employee*

June 2025 – August 2025

- Maintained school district grounds, ensuring safe and clean outdoor spaces
- Operated mowers and weed whackers; completed landscaping tasks including weeding and trimming

Campus Involvement

Delaware Men's Club Volleyball – *Captain*

September 2023 - Present

- Rookie Educator - Mentored new team members and supported player development
- Awards: Rookie of the Year - 2024 (Freshmen Year), A Team MVP - 2025, 26, Defensive Player of the Year 2025, 26

Projects/Lab Work

Study on Sleep Patterns and Grade Level – *Biomedical Experimental Design & Analysis*

- Analyzed the different hours of sleep depending on grade level to determine significance of hypotheses
- Used JMP, Excel, GraphPad and various statistical methods to help visualize and determine our findings

Tabletop Game Design Project – *Introduction to Engineering*

- Designed and developed a tabletop game simulating engineering challenges across disciplines, including civil, mechanical, and electrical engineering.
- Used 3D-printed pieces, laser-cut components and an interactive CPX Circuit Playground spinner.
- Collaborated with a team to prototype, test, and refine game mechanics and visuals.

Skills/Strengths

- Proficient in Microsoft 365, Google Workspace, exceptional communication skills, organized, problem solving, time management
- Proficient with skills in SolidWorks, LTSpice, Waveforms, JMP
- Familiar with skills in MATLAB, Python, Arduino and Laser Cutting
